<b>Discussion Topic</b>	<b>Rank</b>
How can farmers and other value chain actors set prices for their commodities without passing through a complex web of intermediaries? From price takers to price setters.	
How can new value chain actors by-pass hurdles and insert themselves in existing value chains and ecosystems?	
How can smallholder farmers and other value chain actors build self-sufficiency?	
How can farmers enter and exit contract farming models towards self-sufficiency?	
How can digital technologies be used to harness the competitive intelligence dispersed among diverse value chain actors?
